# PLUTO

8K PLAYBACK / 4K OUTPUT

**HIVE SDM  
COMPATIBLE  
MEDIA ENGINE**

INGENIOUS BY  
NATURE

The PLUTO variant is a powerhouse of performance, named after one of the world's largest and most powerful bees, symbolizing its strength and capability.

Designed to handle the most demanding media tasks, it offers storage options of 2TB or 4TB, ensuring ample space for high-resolution content. Supporting a maximum media resolution of 8192 x 4320 at 60Hz and delivering output via HDMI 2.0 at up to 4K at 60HZ, Pluto can sample from an 8K media file and output 4k visuals with unmatched clarity and detail, while supporting smooth 240 frames per second for HD content.

With the ability to manage HEVC bitrates up to 800 Mbps, Pluto excels in advanced playback scenarios, supporting up to two 4K layers or a single 8K layer. This makes it the ultimate solution for professionals who demand top-tier performance and versatility in their media workflows.
